SUMMARY

AI-Enabled Fullstack Developer with 11+ years of hands-on experience delivering production-grade web applications using Angular, React, C#, .NET Core, and Azure/AWS. Skilled in building scalable, high-performing systems for FinTech, Healthcare, and EdTech domains. Experienced in Ollama LLMs, FastAPI streaming APIs, LangChain, Vector DB, and GitHub CoPilot. Strong focus on code quality, user experience, and maintainability, with a consistent record of improving system efficiency and collaboration across teams.

SKILLS

AI/ML: LangChain, Ollama (Qwen2.5:14B), ChatGPT, GitHub CoPilot, FAISS VectorDB, FastAPI, Python, SSE, MCP, n8n Automations, RAG Systems, Playwright Automation.

Frontend: HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Kendo, FlexBox, Responsive Design, NPM, NodeJS, ReactJS, Redux, RxJS, NgRx, Angular (2-19), State Management.

Backend: OOP, C#, .NET Framework, .NET Core, .NET 5+, RESTful API, ASP.NET Web API, Microservices, SOLID, Design Patterns (Factory, Strategy, Singleton, Repository), Dependency Injection.

Cloud & Infrastructure: Microsoft Azure (App Service, Azure Functions, Service Bus, Event Grid, Blob, Key Vault, App Insights), AWS (Cloudfront, EC2, S3, Lambda)

Databases & ORMs: SQL Server, LINQ, Entity Framework, MongoDB, Relational Database Design, Query Optimization.

DevOps & Tools: Git, TFS, JIRA, Azure DevOps, TeamCity, Release Management, CI/CD, Postman, Swagger, Confluence, Figma.

Data & Quality Assurance: Unit testing (MSTest, NUnit), MSTest, NUnit, Jasmine/Karma, Integration Testing, Jasmine/Karma, Test Driven Development (TDD), Performance Profiling, Code Coverage Analysis.

Methodologies: SDLC, TDD, Agile (SCRUM/Kanban), Debugging & Troubleshooting.

Soft Skills: Analytical Thinking, Problem Solving Skill, Precise Code Reviews, Performance Optimization, Effective Communication Skill, Influential Mentor, Collaboration, Technical Leadership.

EXPERIENCE

CES, Remote

Dec 2024 - Present

Lead Software Technologist (Fullstack Developer)

- Architected and delivered an Angular 19 enterprise portal integrated with scalable .NET Core Web APIs, significantly improving application responsiveness and overall user experience.
- Modernized and enhanced existing Angular and .NET web applications, resolving performance bottlenecks and ensuring long-term maintainability through clean architecture and modular design patterns.
- Championed automated testing practices by introducing Playwright to the QA and development teams, conducting knowledge-sharing sessions and enabling more reliable end-to-end testing workflows.
- Partnered with cross-functional teams including product managers, UX designers, and QA engineers to translate complex business requirements into scalable and maintainable technical solutions.
- Mentored junior developers on Angular best practices, TypeScript design patterns, and modern frontend architecture, improving code quality and accelerating team delivery velocity.
- Explored and adopted emerging technologies, gaining hands-on exposure to AWS services and AI tooling while preparing for AWS certification to support future cloud-native initiatives.

Atos/Eviden, Pune

Aug 2021 - Dec 2024

Consultant (Frontend Developer)

- Delivered a ReactJS + .NET patient workflow system that improved hospital process efficiency by 30%.
- Led modernization of legacy email communication modules from ASP.NET to .NET Core, increasing patient outreach, engagement, and feedback quality.
- Enforced SOLID principles and utilized CI/CD pipelines to streamline development and deployments.

Cappgemini Technology Services, Pune

May 2020 - Aug 2021

Consultant (Fullstack Developer)

- Redesigned a banking portal UI/UX, improving retention by 20% and reducing load time.
- Developed and optimized frontend modules in Angular and .NET Core, supporting multiple banking services.
- Adopted Agile ceremonies to ensure iterative improvements and timely feedback cycles.

Emerson Innovation Center, Pune

Jan 2020 - May 2020

Senior Engineer I (Fullstack Developer)

- Developed control software using React and .NET Core for real-time valve and machine monitoring systems supporting various industrial clients.
- Applied design patterns (Factory, Observer, Strategy, Repository) to increase code reusability across modules and reduce technical debt; refactored legacy code improving maintainability score.

Tieto India Private Limited, Pune

Feb 2017 - Jan 2020

Software Engineer (Fullstack Developer)

- Built an Angular + ASP.NET Web API application for patient vitals visualization, improving diagnostic precision by 15%.
- Designed and implemented REST APIs with comprehensive API documentation using Swagger, making integration with frontend seamless for a team of 6 developers.
- Championed Agile adoption and DevOps culture across team of 8 engineers, introducing SCRUM ceremonies, Kanban boards, and automated testing; improved sprint velocity and on-time delivery rate.

Infosys Limited, Pune

Jan 2015 - Feb 2017

Senior Systems Engineer (Backend Developer)

- Strengthened foundation in enterprise application development using .NET and C#.
- Worked towards minimizing post-release ticket count to zero and hence achieving 100% efficiency for the client.

TECHNICAL PROJECTS

• PDF ChatBot (Ollama + FastAPI + LangChain) - [Link](#)

Engineered a full-stack AI-powered application enabling intelligent PDF document interaction through natural language processing. Built with 100% local inference using React, Ollama Qwen2.5:14B, FAISS vectors, and FastAPI to extract and analyze PDF content using vector embeddings and semantic search:

- Engineered drag-and-drop PDF upload interface with PyPDF chunking, Ollama qwen2.5:14b LLM, MiniLM embeddings, FAISS similarity search (k=12), streaming Q&A with source citations.
- Designed full-stack architecture with FastAPI, React 18 component-based UI with axios HTTP client, and react-dropzone for file handling.
- Built FastAPI SSE streaming endpoint for non-blocking LangChain calls and real-time token streaming.

• GitHub PR Guard (n8n + Groq AI) - [Link](#)

Engineered an intelligent PR review automation workflow integrating n8n orchestration, Groq LLM, and GitHub Webhooks to analyze code differences and deliver structured AI-driven feedback. Demonstrates expertise in multi-service integration and agentic workflows:

- Implemented GitHub Webhook integration with n8n to trigger automated PR analysis; integrated Groq LLM API for real-time code quality assessment with structured JSON response parsing for severity classification and recommendations.
- Designed decision logic branches to evaluate AI findings and conditionally flag/block PRs based on criticality thresholds; optional Slack notifications for cross-platform team awareness and collaboration.

• Personal Portfolio - [Link](#)

Designed and developed a web app in ReactJS that showcases personal information about me. It helps display relevant information like education, work experience, blogs and contact details - in a structured way. Key enhancements include:

- Set up automated builds and deployment pipelines for streamlined development and release cycles by using services provided by GitHub pages.
- It utilised a Component-Based Architecture to ensure re-usability and modularity of the code base.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Trained in Agile practices.

EDUCATION

Bachelor of Engineering - Computer

2010 - 2014

Pune University

Relevant coursework: Object Oriented Programming, Operating Systems, Databases, Data Structures & Algorithms, Web Technologies, Software Engineering.

ACHIEVEMENTS

- Sharing insights on software development and relevant topics via blogs on Medium/LinkedIn.
- Recognized at CapGemini for enhancing and maintaining exceptional code quality standards by presenting *Pat-on-the-Back* award.
- Awarded another *Pat-on-the-Back* recognition at Tieto for outstanding customer satisfaction and teamwork.
- Successfully participated in *Cod-e-thon*, a competitive three-day coding marathon hosted by Tieto, showcasing problem-solving abilities.
- Played a pivotal role as an organizer for *Metamorphosis 2k16*, the RCL Fest hosted by Infosys.
- Secured first place in the *Crack C* programming competition at Smt. Kashibai Navale College of Engineering.
- Emerged as an active debater by actively participating in debate competitions, such as *Youth Parliament*, showcasing strong communication skills.
- Passed the intermediate proficiency exam in *Tabla*, an Indian musical instrument, reflecting dedication and cultural involvement.
- Cleared the *Intermediate Drawing Examination*, highlighting creativity and artistic skills.
